* Assuming 250 Argos transmissions per day. ** Assuming 250 Argos transmissions and four Fastloc snapshots per day. Tag life can be extended by duty cycling.

The Low Impact Minimally Percutaneous Electronic Transmitter (LIMPET) is a satellite transmitting tag widely used for cetacean tracking. Its small size allows for deployment high on the dorsal fin to enable frequent transmissions to the Argos satellites. LIMPET tags are designed to be deployed using Dan-Inject CO₂ rifles. Crossbow deployment accessories are also available. Accessories are not included in the price of the tag.

Model: SPOT-240

Model: SPLASH10-292

Model: SPLASH10-F-333
